

EXPERIENCE LETTER

Dear Samarth Samir Dumasia,

It is our pleasure to acknowledge your participation in the **20-Day Resident Robotics Program** at My Equation™.

Designed as an intensive residential training experience, the program combined classroom learning with practical implementation to provide a holistic understanding of modern robotics.

During the course of the program, you explored the fundamentals of Mechanical Engineering, Engineering Mathematics, Industrial Design, Electronics, Artificial Intelligence & Machine Learning, and ROS 2, before progressing to the implementation of these concepts through simulation, hardware integration, and project development.

A key highlight of the program was the development of a major hardware-based robotics project on either the **TurtleBot or the Robotic Manipulator Arm**. Over **60+ hours** of technical sessions and collaborative project work, you worked in teams on hardware assembly, system integration, implementation, testing, and validation, gaining practical exposure to the complete development cycle of a robotic system while strengthening your analytical thinking, teamwork, and problem-solving skills.

Being a part of your learning journey has been truly rewarding. We wish you continued success as you take your next steps in robotics and engineering, and we look forward to seeing you return for more advanced projects and learning opportunities with us in the future.

We wish you every success in your journey ahead.

With Best Wishes,
Team My Equation™

RRP | RESIDENT ROBOTICS PROGRAM

CERTIFICATE

OF PROGRAM COMPLETION

This is to certify that

Samarth Samir Dumasia

has successfully completed the Resident Robotics Program (RRP) a 60 hrs hands-on, intensive learning experience in Robotics and Artificial Intelligence. The program provided real-life exposure to hardware systems, robotics development, and intelligent automation.

We commend their dedication, innovation, and commitment throughout the program.
